Guide

PRODUCT OVERVIEW

Sencor® herbicide offers highly effective control of tough weeds on dormant and actively growing bermudagrass turf. Broadleaf weeds controlled by Sencor include common chickweed, corn speedwell, henbit, parsley-piert, and spur weed. Usually, one postemergent application of Sencor in the spring will provide control through the fall. When used according to label directions, Sencor is nonthreatening to established bermudagrass. Sencor is a dry flowable formulation (75% active).

EFFECTIVE TANK-MIX OPTIONS

Sencor can be tank mixed with MSMA to control crabgrass, nutsedge, barnyardgrass, common yellow woodsorrel, sandbur, and dallisgrass.

WEEDS CONTROLLED

Dormant Turf	Actively Growing Turf
<ul style="list-style-type: none"> • Alkali mallow (<i>A. sida</i>) • Bedstraw* • Carolina geranium* • Carpetweed • Common chickweed • Corn speedwell* • Henbit* • Hop clover* • Spotted bur clover* • White clover* • London rocket • Nettleleaf goosefoot • Parsley-piert* • Prostrate knotweed* • Red deadnettle* • Silversheath knotweed* • Shepherdspurse • Small flowered buttercup* • Spotted spurge* • Spur weed* • Wild mustard 	<ul style="list-style-type: none"> • Annual bluegrass (<i>Poa annua</i>) • Goosegrass* • Littleseed canarygrass • Rabbitfootgrass

* Not registered for use in California

Key Weeds Controlled

- Chickweed
- Corn Speedwell
- Annual Bluegrass
- Parsley-Piert

Benefits

- Highly effective in control of goosegrass
- Broad-spectrum weed control
- Long-lasting control
- Nonthreatening to established bermudagrass
- Great tankmix option

FREQUENTLY ASKED QUESTION

Q: Besides herbicides, what are some strategies to prevent weeds?

A: In addition to a good herbicide program, other factors can help prevent the spread of most weed varieties. Improper irrigation and unbalanced, multinational levels result in thick, weak turf, which is more susceptible to diseases and weeds. Vertical cutting and other cultivations should coincide with optimum conditions for a healthy fill-in. Remember, sanitation can be your best weapon against the spread of weeds. Mowers, vertical cutters and other equipment should be thoroughly cleaned on a routine basis.
