

“Consequently, we deal with slow, bumpy greens from seedheads and it’s difficult for members to understand that. By preventing them, we are promoting a good putting surface at a very key time of the year. Proxy does a real nice job preventing Poa seedhead production. We started using it the first year it was registered in New York about four years ago. It wouldn’t be spring without it!”

Jim Frank, Superintendent, Country Club of Buffalo, Buffalo, NY

Seedhead Suppression			
Application	Sites	Rates	Spray Volume
<i>Poa annua</i> and White Clover Seedhead Suppression: Reapplication interval: 2 weeks or greater for all labeled grasses	Golf course turf including Greens, Tees, Fairways and Roughs Commercial Turfgrasses including Bentgrass, Kentucky Bluegrass, Perennial Ryegrass, Tall & Fine Fescue, and Bermudagrass	5 fl. oz./1,000 ft ²	1.0-2.0 gal/1,000 ft ²
Tank mixture with Primo MAXX: Tank mixtures of Proxy at 5 oz/1000 ft ² and Primo MAXX at 0.125 or 0.25 oz/1000 ft ² can be used to promote seedhead suppression as well as turfgrass quality. Follow the recommendation on each product label for the most restrictive application interval for each turfgrass.

WHAT IT IS.

A Type II plant growth regulator.

WHAT IT GIVES YOU.

- Regulates growth of desirable grasses in cool-season turf, especially roughs and tall grass
- Provides seedhead suppression of both *Poa annua* and white clover

WHY IT BEATS THE COMPETITION.

- Less chance of phytotoxicity than with other regulators
- When tank mixed with Primo MAXX®, it controls seedheads more consistently than competitors

HOW IT MAKES YOUR JOB EASIER.

Gives you and your players denser, tighter-knit, more playable turf. Controls those seedhead emergencies in the spring. Reduces labor by controlling growth around bunkers, green/tee complexes, and other harder-to-mow areas.

RELAX. YOU'RE BACKED BY BAYER.

Training. Troubleshooting. Innovating. Count on us to stand behind you now and for years to come. Get science and support at BackedByBayer.com or 1-800-331-2867.

PROXY

THE SCIENCE OF PROXY® GROWTH REGULATOR.

Proxy® helps control growth of desirable cool-season grasses and suppresses seedheads of *Poa annua* and white clover. Proxy doesn't cause initial turf shock, phytotoxicity or post-application growth surge.

Reliable growth regulation throughout

- Kentucky bluegrass
- Perennial ryegrass
- Tall and fine fescue
- Bentgrass
- Bermudagrass

Powerful seedhead suppression

- *Poa annua*
- White clover

Application Tips

Apply Proxy when turf has reached desired height for the season, and when temperature is 65 degrees and rising. Avoid applying it in areas with an excess of thatch. Apply three or more hours after mowing. Proxy is excellent around bunkers, roughs, and other hard-to-mow areas.

Tank mixes of Proxy and Primo MAXX® can be used to promote seedhead suppression of *Poa annua* and white cover, as well as turf grass quality. Multiple applications of the tank mix combination may be needed, so be sure to follow the recommendation on each product label.

THE SCIENCE OF YOUR PROFESSION.

Every ounce of Proxy is Backed by Bayer, and all the science and support you need to get the job done right. That's what you should expect from an industry leader.

Our staff is your staff.

No one invests as much in product development as Bayer. Our scientists' expertise in chemistry and formulation technology is unrivalled around the world. Our field sales and technical representatives are always ready to help you. You'll find them, along with additional information, 24 hours a day, 7 days a week at BackedbyBayer.com.

Product support year round.

We'll help you diagnose problems, troubleshoot issues, and get every product benefit you expect—and even some you don't. We also offer interactive training throughout the year.

Complete satisfaction guarantee.

Bayer guarantees your satisfaction, after all, your success is our success.
